

TP2 Spray kit

TP2 Spray kit is a multipurpose, powerful 110 V electric mini-pump, lightweight and easy to transport. The wedge clasps guarantee easy handling and dismantling. Also the polyurethane funnel is equipped with a smooth finish for easy cleaning. The frequency controlled drive provides continuous adjustment for output.

It is made for all common premixed materials up to a maximum grain size of 3mm.

Applications include: Plasters, Mortars, Insulation Renders, Paints, Spray Fire Protection, Premixed Decorative Plasters and Waterproof Coatings.

The TP2 particularly stands out due to its light construction and flexibility especially when working indoors.

The TP2 Spray kit from CES includes the compact and lightweight Giema TP2 pump and all the accessories you need in either a 10m or 20m hose set. All you need to add is a matching compressor and you are ready to go.

The TP2 can be used as a regular manually filled pump or in conjunction with a Baron Mixer to enable the most efficient use of the pump.

Optional Compressor:

- Compressor Gentilin 110 V

Optional Mixers:

- BARON M80 - 80L, forced action mixer, 1.1 kW, 110 V
- BARON M110 - 110L, forced action mixer, 1.1 kW, 110 V

Available to Hire or Buy, call for detailed pricing

Equipment includes:

[Available with 10m or 20m hose kits]

Connection for remote control
Stator/Rotor 2-6 ltr./min.
Detachable polyurethane funnel with smooth finish
Remote control cable
Air hose ½"
Mortar hose NW 20
Spraying device with ball valve

Technical data

TP2 110 V

Type of pump	N13S and N13S 1/2
Output	0.7 - 6 ltr./min.
Delivery pressure	up to 15 bar
Delivery	20 mtr.
Electrical connection	110V/50Hz
Drive	1.8 kW
	variable output speed
	60-470 rpm
Capacity	27 ltr.
Weight	33 Kg
